Phone: 509-400-6203

**PUBLIC AND FIREFIGHTER SAFETY IS THE NUMBER ONE PRIORITY**

### **Quick Facts:**

- Kinkaid: 221 acres
- Nanamkin: 92 acres
- 18% containment
- Personnel: 233
- Cause: Lightning

### **Yesterday:**

The Kinkaid Creek Fire had more visible smoke due to crews carefully guiding and assisting fire down the southeast portion to an area where crews could safely build direct fireline. Super scoopers were utilized to mitigate fire behavior and meet that objective. On both fires crews continued building direct and indirect fireline working their way around the fire edges, mitigating snags as needed. Kinkaid Creek is about 50% lined. South Nanamkin is 100% lined. Hose lays were installed to assist mop up activities in areas with minimal fire behavior.

### **Today:**

On the Kinkaid Fire, crews will continue monitoring the eastern portion of the fire as it creeps down the hillside to an area where direct fireline can be built. On both fires, direct line construction will continue with improvement on existing dozer and handlines to secure the fire's edges. Hose lays will be extended to support mop up activities occurring in areas with minimal fire behavior.

**Transition:** Northeast Washington Incident Management Team 2 will be handing off the fire to NW Team 3 tomorrow morning at 6 am. Team 2 would like to thank the Colville Confederated Tribes for their collaboration and assistance over the last few days.

**Weather:** Mild, dry and breezy conditions. High 77, Low 56. Humidity 24%. Light winds with gusts up to 17 mph in the afternoon.

**NO Evacuations and Road Closures**
